

ABSTRACT: A trimmer glove (19) designed for providing comfort against the heat created by the tool, the hair clipper (15&17), while in use on a haircut. Made of neoprene (19) the user can slip the clipper/trimmer into the glove and easily access on/off switch (16), and the power cord (18) through a hole in the bottom of the trimmer glove (22) to be plugged into any electrical outlet and offer protection to the hand against the heat of the hair clipper (15&17) without disturbing the haircutting process.
